

NOTES ON ROSACEAE

J. Henrickson

Department of Botany, University of Texas, Austin 78712

The following combinations under Purshia are made to allow annotation of specimens currently on loan. Studies have confirmed that Purshia is derived from Cowania and the genera are to be combined. Comprehensive supporting data will be published elsewhere.

Purshia ericifolia (Torr. ex Gray) Henrickson comb. nov.  
Cowania ericifolia Torr. ex Gray, Pl. Wright. 2:106. 1853.

Purshia mexicana (D. Don) Henrickson comb. nov.  
Cowania mexicana D. Don, Trans. Linn. Soc. 14:575. 1825.

Purshia plicata (D. Don in Sweet) Henrickson comb. nov.  
Cowania plicata D. Don in Sweet, Brit. Fl. Gard. II. pl. 400. 1838.

Purshia stansburiana (Torr. in Stansb.) Henrickson comb. nov.  
Cowania stansburiana Torr. in Stansb., Exped. Great Salt Lake 386. 1852.

Purshia subintegra (Kearney) Henrickson comb. nov.  
Cowania subintegra Kearney, Madrono 7:15. 1943.
